TO WHOM IT MAY CONCERN

RE: Open Air Series – Recycled content.

Regarding the content of recycled material of our above mentioned range, please note the following:

1) LEED CREDIT MR 4,1

We confirm that our Open Air series contains at least 10% of recycled raw material (pre-consumer)

2) LEED CREDIT MR 5,2

We confirm that the Open Air series is produced with over 20% of regional raw material.

3) LEED pre-requirement EA 2

Minimum Energy Performance.

We confirm that our Open Air series has a water absorption lower than 1%, therefore is part of the High Greiflicated Product group.

4) LEED CREDIT EQ 4,2

Product with low emissions of V.O.C.

We confirm that our Open Air series has **NO** emissions of V.O.C.

We can also state that the Open Air series is produced in accordance with LEED product durability standards: EN ISO 10545,6 - EN ISO 10545,7 - UNI EN ISO 10545,13 - UNI EN ISO 10545,14 - UNI EN 14411

This should be 1 credit, though it is not official but on a pending request by GBC Italy.

ASCOT GRUPPO CERAMICHE S.R.L. is also a member of the Green Building Council Italy.

Furthermore, we would like to state that our production procedures include:

RECYCLING OF 100% OF WATERS

RECYCLING OF 100% OF GLAZES

RECYCLING OF 100% OF PLASTICS AND CARTONS

RECYCLING OF 100% OF COOKED AND UNCOOKED TILES

WE BUY ONLY RECYLED CARTON, PLASTIC AND EURO-PALLETS (REUSABLE).

Based on all of the above, our Environmental Manager can state that our **ECO-IMPACT** is at least **25%** of recycled material.

I hope this is clear, please do not hesitate to contact me for any further explanation.

Kindest regards,

Andrea Cremonini
